- * Reduces workman's comp claims.
- * Increased productivity.
- * Improved employee moral.
- * Low profile 5-3/16".

The American Furniture Manufacturing Association recently published a Voluntary Ergonomics Guideline for the furniture manufacturing industry. City Machine Co. Inc. in association with North Carolina State University developed devices to address issues related to ergonomic hazards in the work place. *City Lift* is designed specifically for the upholstery industry. Eliminate heavy lifting and ergonomically incorrect work positions.
